Phone: (510) 737-8833

I am a 17 year old aspiring developer and designer. I am eager to learn and am passionate about all of my work. I have experience with graphic design, animation, UI/UX design, Python, JavaScript, working with clients, and am always looking to grow and learn more.

Work Experience

Reselling

November 2019 to Present

I resold limited, hard to get items, mainly shoes, clothing, and collectibles, at a higher price point on the secondary market. This often required being able to gauge the market regarding each item, deal with customers firsthand, and manage inventory, sales, and money when dealing with large volumes of product.

Barista/Server

Itea - Newark, CA July 2019 to December 2019

I made and served drinks as well as handled customer requests and equipment maintenance.

Teacher's Assistant

Tri-City Chinese School - Fremont, CA September 2017 to June 2019

I assisted the teacher in anything that was needed, such as helping students with their homework, setting up activities, running errands, and providing one on one assistance to students.

Education

High School Diploma

American High School - Fremont, CA Class of 2021

Computer Science B.S. Department of Mathematics and Computer Science

Skills

Computer Skills, Computer Graphics, JavaScript, HTML, CSS, Python, Selenium, Google Cloud Platform, Video Editing, Graphic Design, Web Design, Illustration, Food Service, Teaching Experience, Customer Relationship Management,

Languages

English, Mandarin, Indonesian

Projects

Autofills

- Used JavaScript to create chrome extensions that automated filling out checkout forms for Shopify, Stripe, and supremenewyork.com checkout pages.

WoodstackNY Bot

- Used Python and Selenium to create a program that automated the login and add to cart process for products on woodstackny.com.
- My program automated the add to cart process then scraped the frontend cookies from the cart page and added them into new browsers, allowing for multiple checkouts at a time.
